

Drishti-NE Hackathon

Team Eligibility Verification Document

Hosted by

Indian Institute of Management (IIM) Shillong

Team Name: **BiTZ**

Problem Statement / Track: The North-Eastern region of India, particularly Assam, faces recurrent flooding from the Brahmaputra and Barak rivers, causing severe loss of life, livelihoods, agriculture, and critical infrastructure, especially in remote and rural communities. Existing flood early warning systems are largely centralized, low-resolution, and limited in accuracy and coverage, resulting in delayed and ineffective alerts at the local level. There is an urgent need for a region-specific, decentralized, AI-powered flood prediction and alert system that leverages real-time multi-source data to deliver accurate, localized, and timely warnings, thereby strengthening disaster resilience and advancing sustainable development in the North-East—aligned with the Drishti-NE mission.
